

## S. Korean Conservative Remnants' Moves for Confrontation Policy Denounced

The Committee for the Peaceful Reunification of the Country of the DPRK issued a white paper Friday to reveal the criminal nature of the "north policy" of traitor Park Geun Hye and catastrophic consequences that ensued, and the nature of the desperate moves of the puppet conservative remnants to carry forward the policy for confrontation with the DPRK to the next regime.

The white paper branded the south Korean puppet conservative regime's north policy as the hideous theory for confrontation between social systems, theory for war of aggression and theory of following outsiders.

It went on:

The policy pursued by Park Geun Hye has been hideous confrontation policy against the nation and peace and reunification peppered with hostility toward the fellow countrymen, greed for invasion of the north and sycophantic treachery.

"Confidence-building process on Korean peninsula", theory of "maintaining principle" and theory of "great chance for reunification", etc. are theories for confrontation between social systems and sordid anti-reunification theories in distortion of the essence of the issue of the country's reunification.

The essence of the "north policy" put up by traitor Park is based on the hideous theory of war against the north aimed to invade the DPRK by force in line with the U.S.

Out of all the successive puppet rulers of south Korea, Park Geun Hye is the worst traitor as she has been hell-bent on sycophancy toward the U.S. and cooperation with outsiders to escalate confrontation with the fellow countrymen.

The white paper disclosed how the puppet conservative group's policy for confrontation with the fellow countrymen pushed the north-south relations into a catastrophe.

Park Geun Hye and the group of conservatives were not concerned about the improvement of the north-south relations, reunification and the destiny and future of the nation as they were obsessed by confrontational

conscience.

During Park's office of four years, there has been no proper dialogue between the authorities of the north and the south, and hard-won contact and dialogue ended just in their first round. All the human and material exchanges between the north and the south have been stalled, and channel for communications blocked, pushing the north-south ties into the total stalemate in history.

The Kaesong Industrial Park, product of the June 15 joint declaration and the last lifeline of north-south relations, was shut down.

The traitor did not hesitate to push the north-south relations to extreme confrontation through unprecedented "human rights" racket.

The white paper disclosed how the remnants of the puppet conservatives have gone desperate in their efforts to carry forward the confrontational policy to the next regime while clinging to it.

They have gone desperate, being seized by extreme uneasiness as it is clear to them what fate they will meet for actively pursuing the policy for confrontation with the DPRK in case there opens the way for improving the north-south relations after progressive and democratic forces come to power.

They are trying hard to defend and justify the traitor's confrontational policy, rally those supporting the conservatives and carry it forward to the next regime and thus check the total bankruptcy of the conservative group.

The traitorous crime against reunification of the conservative remnants pushing the north-south relations into further catastrophe in violation of the nation's desire for reunification will be cursed and denounced by the whole nation.

The white paper stressed that the group of traitors would meet only the most miserable ruin for going desperate to maintain Park's hideous policy for confrontation with the fellow countrymen.
