KCNA Commentary Urges U.S. to Stop Nuclear Threat to DPRK

Pyongyang, November 24 (KCNA) -- The U.S. has gone mischievous nowadays to stop the DPRK from making advance as the nuclear force of Juche Korea has almost reached the phase of completion.

As the DPRK's action for completing its state nuclear force is becoming a fait accompli, the Trump group is floating the story of "nuclear attack" on the DPRK, trying to make it sound plausible.

By putting forward those soldiers who retired from service of the nuclear force, the U.S. is opening to public every procedure for executing the nuclear attack. The group is getting vocal that "President Trump would choose a plan already existing on table when he see it as a moment to use a nuclear weapon against north Korea" and that "it is almost impossible to stop the decision".

Meanwhile, the U.S. is setting afloat information that it is making actual preparations for a nuclear war with the DPRK as evidenced by the report about the August nuclear bombing drill targeting the DPRK which B-52 of its air force conducted with Japan Air "Self-Defense Force" in areas around the Korean peninsula.

Such movement of the Trump group is aimed to pressurize the DPRK from taking a measure for completing the building of a nuclear force at the final phase.

In conclusion, the U.S. had better clearly understand who its rival is.

If the U.S. is finally going to inflict a nuclear war on the DPRK, by finding fault with the DPRK's self-defensive measure for completing the national nuclear force, the DPRK will not hesitate to respond to it with the nuclear attack to wipe out the U.S.,

empire of evil, from the earth.

It seems that the U.S. has lingering attachment for the Caribbean crisis in the 1960s. It will be a grave miscalculation for the U.S. to think that it can revive the Caribbean crisis on the Korean peninsula and bring down the DPRK.

The Korean peninsula is not the Caribbean region and the Korean People's Army is not such a weak one who would put down its nuclear weapon at the nuclear threat and blackmail of the U.S. The KPA is the invincible and ever-victorious powerful army full of the spirit of annihilating enemies.

The KPA is a heroic army which wrested surrender documents from the U.S. without nuclear weapons in all forms of confrontation with the U.S. including the 1968 Pueblo incident and the 1976 Panmunjom case.

No force on the earth can bring into submission the DPRK whose leader, army and people have formed a harmonious whole and it is truth proven by the history of the DPRK-U.S. stand-off that the DPRK will always emerge victorious.

The DPRK is a dignified nuclear power and a world-level military power and gone are the days never to return when the U.S. used to threaten the DPRK with nuclear weapons.

Trump had better ponder over the saying that "Give measure for measure". -0-

U.S. Introduction of Strategic Assets Flayed

Pyongyang, November 24 (KCNA) -- Jong Nam Hyok, researcher at the Institute for American Studies of the Foreign Ministry of the DPRK, in a commentary Friday disclosed the danger of the U.S. move to send its strategic assets towards the Korean peninsula.

Saying that centuries-long nuclear blackmail and intimidation of the U.S. against the DPRK have now reached the zenith, the commentary noted that the U.S. introduction of its strategic assets has got more provocative and dangerous in the estimation of its

round, size and content than before, though it is less than 1 year since Trump took office. It went on:

No one can vouch that the U.S. moves will not lead to a preemptive nuclear attack and total war against the DPRK any moment.

The above-said U.S. actions were prompted by its strategic calculation to keep a firm hold on Japan and south Korean puppet forces, speed up the triangular military alliance with them and militarily pressurize and contain potential foes, China and Russia.

Such moves are further fanning up arms race in the Northeast Asian region as they are destabilizing the region.

The U.S. increasing nuclear blackmail and threat have made the DPRK keenly feel the justness of its line of simultaneously developing the two fronts and compelled it to speed up the beefing up of its nuclear force for self-defense. -0-
