## Kim Jong Un Gives Guidance to Nuclear Weaponization

Respected Supreme Leader **Kim Jong Un** guided the work for nuclear weaponization on the spot.

He was greeted by senior officials of the Department of Munitions Industry of the Central Committee of the Workers' Party of Korea (WPK) and scientists of the Nuclear Weapons Institute before being briefed on the details of nuclear weaponization.

The institute recently succeeded in making a more developed nuke, true to the strategic intention of the WPK for bringing about a signal turn in nuclear weaponization.

He watched an H-bomb to be loaded into new ICBM.

Saying that he felt the pride of indomitably bolstering up the nuclear forces at a great price while seeing the Juche-oriented thermonuclear weapon with super explosive power made by our own efforts and technology, he expressed great satisfaction over the fact that our scientists do anything without fail if the party is determined to do.

He acquainted himself with technical specifications and structural and operational characters of the H-bomb.

The scientists further upgraded its technical performance at a higher ultra-modern level on the basis of precious successes made in the first H-bomb test.

The H-bomb, the explosive power of which is adjustable from tens kiloton to hundreds kiloton, is a multi-functional thermonuclear nuke with great destructive power which can be detonated even at high altitudes for super-powerful EMP attack according to strategic goals.

All components of the H-bomb were homemade and all the processes ranging from the production of weapons-grade nuclear materials to precision processing of components and their assembling were put on the Juche basis, thus enabling the country to produce powerful nuclear weapons as many as it wants, he said.

Noting that the scientists, technicians, workers, soldiers and officials in the atomic power industry, who have made devoted efforts to raising the level of nuclear weaponization up to its perfection as intended by the Party, are creditable "nuclear combatants" of the Party who are upholding its line of simultaneously developing the two fronts with the strongest nukes, he highly praised their exploits.

Underlining the need for the institute to dynamically conduct the campaign for successfully concluding the final-stage research and development for perfecting the state nuclear force, he set forth important tasks to be fulfilled in the research into nukes.

## **Kim Jong Un Has Photo Session with Active Secretaries of Primary Organizations of KPA Youth League**

Respected Supreme Leader **Kim Jong Un** had a photo session with the participants in the fourth conference of active secretaries of primary organizations of the youth league of the Korean People's Army (KPA).

He warmly congratulated the secretaries of primary organizations and young officials of the youth league of the KPA who are fully demonstrating the resourcefulness and bravery of youngsters at the posts standing guard over the homeland and at major sites for building a socialist power, while actively defending, explaining and implementing the Workers' Party of Korea's idea of prioritizing the youth and arousing soldiers into heroic feats.

Expressing expectation and conviction that the participants in the conference would turn the primary organizations of the youth league of the army into elite vanguard ranks in the flames of the Songun revolution and creditably fulfill the sacred mission and duty they have assumed before the times and the revolution in the van of the Korean youth movement as required by the modeling of the whole army on Kimilsungism-Kimjongilism, he had a photo session with them.

Present at the photo session were leading officials of the KPA General Political Bureau including Hwang Pyong So.
