## **S. Korea's Support for "Resolution on Sanctions"**

### **against DPRK under Fire**

Pyongyang, September 14 (KCNA) -- A spokesman for the Consultative Council for National Reconciliation Thursday released a statement denouncing the south Korean puppet authorities for disgusting behavior talking about "support" and "welcome" of the UNSC "resolution on sanctions" 2375 cooked up by the U.S. and its vassal forces.

Those of Chongwadae claimed "escalating of sanctions" and "a new lock" and those of south Korean puppet Foreign Ministry released a poor "government statement" which said "it was the reiteration of the strong will not to allow the nuclear development of the north" and that "the north should seriously heed the warning of the international community".

Meanwhile, the south Korean authorities urged all the ministries and agencies to say in the same tone as the UN "resolution on sanctions", calling for tightening the "pressure on the north" by taking various diplomatic measures and providing a "bill for tougher independent sanctions".

The statement branded those behaviors as strange ones made by those fools running amuck failing to foresee their future.

They can never be pardoned as they hailed in the van the UN "resolution on sanctions" which gravely hurt and insulted the independent dignity of the DPRK and ran amuck in confrontation campaign talking about a "bill for independent sanctions", the statement noted, and went on:

We keep tabs on all the improper behaviors of the present south Korean authorities and we will force them to pay dearly for all the crimes.

They should remember our warning that if they persistently resort to the reckless moves of "sanctions" and "pressure", they would lose an opportunity for dealing with the north forever and everything would finish in a moment.

They should not forget even a moment that the warning of the DPRK will bring practical action.

They would be well advised to think twice about the catastrophic consequences from their disgraceful behaviors.

## **S. Korean Authorities' Additional Deployment of THAAD Denounced**

Pyongyang, September 14 (KCNA) -- The south Korean authorities committed the additional deployment of four THAAD launchers and related equipment.

A spokesman for the Pan-Korean Emergency Measure Committee for Opposing Nuclear War Drills against the DPRK in a statement Thursday denounced the THAAD deployment as an outright challenge to the fellow countrymen including the south Koreans and the international community, and an unpardonable criminal act of pushing the extremely tense situation on the Korean peninsula and the region to more dangerous phase.

The U.S. imperialists have maintained their illegal presence in south Korea for more than 70 years with the help of the group of traitors who decided to introduce THAAD, nuclear war monster of the U.S., during the puppet conservative regime. This has provided them with the pretext for their permanent military presence in south Korea under the pretext of THAAD and inflicted huge human and environmental damage and massive economic burdens on the south Koreans, who now even face the danger of horrible nuclear holocaust any moment.

It is quite natural for the people of various circles in south Korea to vehemently denounce the present authorities for winding up the deployment of THAAD which traitor Park Geun Hye decided on, the statement said, adding:

THAAD additional launchers turned south Korea into the U.S. nuclear advance base and a nuclear war arsenal for aggression on the north and the strategy for world domination, making south Korea the first target of preemptive strikes and retaliatory blows just like a shrimp getting its back broken in a fight between whales.

The puppet authorities, driven into a tight corner being strongly denounced by the people from all walks of life and the public at home and abroad, are justifying the additional deployment of THAAD, describing it as the one for "coping with the north's nuclear and missile threats", but with no sophism can they cover up the traitorous crime.

They will be made to deeply regret that its acts of introducing THAAD of the aggressors while regarding the nation's treasured sword as a thorn in the flesh and regarding the THAAD as a treasure even though they would plunge whole south Korean land into sea of nuclear war would be a never-to-be-pardoned treachery.

## **KAPPC Spokesman on DPRK Stand toward UNSC "Sanctions Resolution"**

Pyongyang, September 13 (KCNA) -- The U.S. committed another state terrorism by cooking up new "sanctions resolution" 2375 against the DPRK at the United Nations Security Council with voting machines on Tuesday.

In this regard, a spokesman for the Korea Asia-Pacific Peace Committee stresses in a statement on Wednesday that the army and people of the DPRK have turned out in a nationwide and all-people confrontation against the U.S., burning their hearts with surging anger and hatred toward the U.S. imperialists and their followers.

The statement says:

The army and people of the DPRK are unanimously demanding that the Yankees, chief culprit in cooking up the "sanctions resolution", be beaten to death as a stick is fit for a rabid dog.

The Yankees are the sworn enemy and group of wolves which can never be allowed to go as they have massacred and persecuted the Korean people century after century. The group of gangsters should never be pardoned for having ruthlessly trampled down our sovereignty and right to existence. There's limit to patience. Now is the time to annihilate the U.S. imperialist aggressors. Let's reduce the U.S. mainland into ashes and darkness. Let's vent our spite with mobilization of all retaliation means which have been prepared till now. These are voices of the Korean army and people.

Also heard in the DPRK are strong accusations against the Japs who have zealously joined in the U.S. racket for sanctions.

The behaviors of Japs, sworn enemy of the Korean nation, are enraging us. The wicked Japs should not be pardoned as they have not yet made a sincere apology for the never-to-be-condoned crimes against our people but acted disgustingly, dancing to the tune of the U.S. "sanctions". A telling blow should be dealt to them who have not yet come to senses after the launch of our ICBM over the Japanese archipelago. The four islands of the archipelago should be sunken into the sea by the nuclear bomb of Juche. Japan is no longer needed to exist near us. This is the voices of the enraged Korean army and people.

Our army and people's resentment at the south Korean puppet regime is getting stronger. What they have contended is; The south Korean puppet forces are traitors and dogs of the U.S. as they call for harsher "sanctions" on the fellow countrymen. The group of pro-American traitors should be severely punished and wiped out with fire attack so that they could no longer survive. Only then, the entire Korean nation can thrive in a reunified territory to be proud of in the world.

The army and people of the DPRK are also enraged at the UN Security Council which has turned into a tool serving the U.S. without regard to peace and security of mankind.

The UNSC moves only on the instruction of the U.S., and it is a tool of evil which does not ensure the global peace and security but ruthlessly wrecks them on the contrary. It is pitiful to see the behavior of big powers and money-bribed countries which voted for "anti-DPRK sanctions", disregarding justice, moral sense and conscience. The

UNSC is made up of those unprincipled countries and, accordingly, such useless tool should be disbanded at once.

This is what all the people in the DPRK have in view and demand.

The said angry voices just represent a statement of the Korean people to the U.S. and its followers.

Dogs bark, the caravan moves on. Our army and people will never waver but do what they are determined regardless of "sanctions" no more than rotten net.

The adoption of heinous "sanctions resolution" hardens our faith that what we should depend on is only our self-defensive nuclear force as well as our unshakable will to go only along the road of simultaneously pushing ahead the economic construction and the building of nuclear force.
