Supreme Leader Kim Jong Un Inspects Wonsan-Kalma Coastal Tourist Area under Construction

Kim Jong Un, chairman of the Workers' Party of Korea, chairman of the State Affairs Commission of the Democratic People's Republic of Korea and supreme commander of the Korean People's Army, with his wife Ri Sol Ju inspected the Wonsan-Kalma coastal tourist area under construction.

Looking at the general layout of the Wonsan-Kalma coastal tourist area, he was informed of progress in its construction project and went round the overall construction site, including a hotel, lodging quarters with cooking facilities, and service facilities, to acquaint himself in detail with them.

Noting that buildings look separated and are little different from each other in height, he gave instructions to make the height of the buildings different, plan more hotels and service buildings of 30 and 25 storeys and ensure that the connection between buildings is more harmonious and peculiar, so as to polish the overall street layout in an artistic way.

Highlighting the need to conduct well the afforestation and greening of the area, he talked about making a nice design for afforestation on the principle that trees of good species are planted to suit the surrounding ecological environment of the coast and doing the work of greening according to the plan.

He pointed out that efforts should be made to construct infrastructural facility net in a qualitative way and that the construction should become a standard.

Looking at the artificial ponds to which sea water was pumped, he said that the ponds should be well made to fit the surrounding environment and look natural, adding that the people will be pleased if angling sites and service facilities are placed around the ponds.

He also gave instructions to provide all of necessary conditions, including first-aid stations at the sections of sea-bathing on the white sandy shore.

It is the Party's long-cherished idea and his long-desired job to build wonderful recreational resorts on the scenic and beautiful shores of our country to let the people enjoy themselves to the full, he said, adding that now it will soon come true.

Such a huge and grand creation campaign as the construction of the Wonsan-Kalma coastal tourist area is an acute standoff with hostile forces trying to stifle the Korean people through brigandish sanctions and blockade, a do-or-die struggle to defend the prestige of the Party and a worthwhile struggle for creating the happiness of the people, he said, and stated that if such magnificent project of large scale is completed surpassing the world's advanced level at such a difficult time as now, the strength of the single-minded unity of the Party, army and people will be displayed to the whole world once again and the coastal tourist area will be a very nice gift to our people.

He called upon everybody to build the sea park without an equal in the world by keeping fortitude and strong courage and present it to the people as a gift on the occasion of Oct. 10 next year.

Saying with a big smile on his face that Myongsasipri (4-kilometer beautiful sand) is likely to become Inphasipri (4-kilometer tide of people), he pictured to himself the appearance of the greatly excited people and school youth and children who will enjoy the new civilization of our times to the full under the benevolent care of the Party.

Accompanying him were Army General Kim Su Gil, director of the KPA General Political Bureau, Hwang Pyong So, first vice department director of the C.C., WPK, Jo Yong Won, O Il Jong and Kim Yong Su, vice department directors of the C.C., WPK, Kim Chang Son, department director of the State Affairs Commission, and Ma Won Chun, director of the SAC.

Supreme Leader Kim Jong Un Visits Hot Spring Area in Yangdok County

Kim Jong Un, chairman of the Workers' Party of Korea, chairman of the State Affairs Commission of the Democratic People's Republic of Korea and supreme commander of the Korean People's Army, gave field guidance to hot spring area in Yangdok County, South Phyongan Province.

The respected Supreme Leader of the party, state and army Kim Jong Un learned about the operation of sanatoria and hot spring resorts in hot spring area from Chairman Kang Il Gyong and officials of the Yangdok County Committee of the WPK.

He said there are a lot of hot spring resources renowned for the beautiful surrounding scenery and enormous efficacy for health and medical treatment of people in different parts of our country but there is no excellent health complex that has been built properly in terms of sanitation and cultured practice as befitting recreational and recuperative facilities. He added that at the end of several days of consideration, he chose hot spring area of Yangdok County that has been appreciated as one of advantageous areas in this aspect, and is going to make field survey and build one excellent service facility.

Yangdok County neighbors a number of counties and is as it is in the middle of the east-west railways and borders four provinces, he said, adding one good point is the traffic convenience with Pyongyang-Wonsan Highway nearby.

As high temperature hot springs rich in sulphur content and extremely small in radon content, the hot springs in Yangdok County have been estimated not only as the ones with considerable annual yield and high pharmacological actions and treatment efficacy but also as pollution-free hot springs as they do not have any ammonium, nitrous acid, nitrogen ion and pathogenic microorganisms, pollution estimation indices, he said, adding that a plan is to develop wonderful all-purpose recuperation and recreational resort in the area.

Going round hot spring valleys in Onjong-ri area of Yangdok County despite high and low mountain ranges and steep passes, he learned about the amount of hot spring water gushing out and environment around them.

Yangdok County is the right place for building hot spring health resort and sanatoria for its high mountain lush with fresh verdure, clean air and beautiful scenery, he said, personally setting the site for building a general hotel. He also instructed to build all kinds of modern health complexes that offer all kinds of hot spring bath services including individual hot spring bath, public hot spring bath as well as indoor bath and outdoor hot spring bath in the area.

Along with the construction of modern health resort and sanatoria, it is necessary to build peculiar hot spring health resort village in the mountainous area as the organic combination of low-storey and single-storey dwelling houses in the area, he said.

He also urged to build railway station characteristic of a mountainous railway station and ensure quality of roads to be paved so that visitors to the hot springs might not feel any inconvenience in traveling.

He underscored the need to give precedence to improving the land and environment around the hot spring area and the need to channel efforts to afforestation.

He said that by face-lifting the hot spring area in Yangdok County associated with the revolutionary history of President **Kim Il Sung** as a monumental edifice, we have to glorify generation after generation the leadership exploits of President **Kim Il Sung** and leader **Kim Jong Il** who built the genuine people's Republic and enforced unprecedented popular policies.

Saying that he feels relieved at his decision to entrust the People's Army, the main force of the revolution and shock brigade in building a powerful socialist country, with the project that has long been developed by the Party for the people, he noted with trust that the People's Army should certainly live up to the expectations of the Party.

He was accompanied by Army General Kim Su Gil, director of the KPA General Political Bureau, Hwang Pyong So, first vice department director of the WPK Central Committee, Jo Yong Won, O Il Jong and Kim Yong Su, vice department directors of the WPK Central Committee, Kim Chang Son, department director of the State Affairs Commission (SAC), and Ma Won Chun, director of the SAC.
