## U.S. "2018 Nuclear Posture Review" Blasted

Pyongyang, February 10 (KCNA) -- A spokesman for the Korea Asia-Pacific Peace Committee in a statement on Saturday said that the U.S. has come under fire worldwide for its "2018 Nuclear Posture Review" (NPR) as it poses a serious threat to the peace of the Korean Peninsula and the world and deals with an extremely dangerous nuclear attempt which will result in a new cold war.

The statement said:

The NPR stipulates that since the DPRK as well as China, Russia and Iran pose a "serious threat" to the U.S. and its allies, the U.S. will start updating the strategic nuclear weapons and developing the "low intensity smaller nuclear weapons" to cope with the "threat" and that it will use nukes to counter the non-nuclear weapons attack on the U.S. and its allies as well as nuclear attack on them.

In particular, describing the DPRK's self-defensive nuclear deterrent as a "threat" to the world peace, the U.S. virtually legalized the updating of nukes and the preemptive nuclear strike at the DPRK.

The U.S. let out a stream of provocative outbursts that it would never pardon the DPRK's nuclear attack on the U.S. and its allied nations, the DPRK would never exist after using nukes and any attack by the latter would lead to the "end of the regime".

It indicates that the reckless nuclear hysteria of the Trump group has reached an extreme phase as it has been hell-bent on stifling the DPRK by force of arms by misrepresenting its just access to nuclear weapons to cope with the nuclear threat of aggression from the U.S. This is another intolerable provocation to the DPRK.

The NPR is a war declaration of the rogue state as it is a criminal war document making the preemptive nuclear strike at the DPRK a fait accompli and means to dare make a preemptive nuclear strike at the world including the Korean Peninsula and unleash a nuclear war.

The gangster-like U.S. is pulling up the DPRK over "nuclear threat" and "denuclearization" while threatening to use nukes as conventional weapons though it has possessed the largest number of nukes in the world. It is the height of impudence and action that a guilty party files the suit first.

The reality eloquently shows it was a wise option that the DPRK accomplished the historic great cause of completing its state nuclear forces true to the line of simultaneously developing the two fronts to cope with the increasing nuclear threat from the U.S.

The U.S. would be well advised not to run amuck, well aware that it will meet its miserable doom while recklessly brandishing its nuclear stick of tyranny, obsessed with the anachronistic design for world hegemony.

## **Japanese Reactionaries' Anti-DPRK Frenzy Denounced**

Pyongyang, February 9 (KCNA) -- A spokesperson of the Institute for Japan Studies at the Ministry of Foreign Affairs of the Democratic People's Republic of Korea (DPRK) gave the following answer to a question put by KCNA on Friday over the fact

that the Japanese reactionaries are becoming more desperate in pursuit of anti-DPRK campaign:

The Japanese reactionaries are getting evermore pronounced in anti-DPRK moves.

Prime Minister Abe of Japan, who moved around some European countries from the very beginning of the year, crying out that our ballistic rockets constitute threats to those countries, is now making despicable attempts to use the 23rd Winter Olympic Games as a venue to agitate for maximum pressure and sanctions against our country.

Particularly, Foreign Minister Kono begged for increased pressure against the DPRK while traveling the countries like Pakistan, United Arab Emirates, Canada and China, and continues to make indiscreet and depraved acts of persuading the countries that have diplomatic relations with the DPRK to fully implement the "economic sanctions resolutions" and sever the diplomatic relations.

Kono even babbled out such nonsense that he "highly appreciates" the so-called "Nuclear Posture Review" released by the Trump administration which has clearly exposed the U.S. wild ambition to threaten other sovereign states with nuclear weapons and dominate the whole world.

The Japanese regime has long deprived itself of the qualification to say anything about peace and stability, as it supports and advocates nuclear big-stick policy of the U.S., the very country that inflicted nuclear disasters two times on the Japanese citizens.

Moreover, all the words and actions of Kono, who is in the van of sanctions and pressure campaign against the DPRK, indicate that he is no less than a puppet of the U.S. and a spokesperson for the U.S. representative in Tokyo, lacking basic logic, knowledge and qualities of a normal diplomat, to say nothing of qualities of foreign minister of a country.

Leading personages of the Japanese regime, not wanting to fall behind Kono, are competing with one another to show their loyalty to the U.S., raising voices for the implementation of anti-DPRK UNSC "sanctions resolutions", which is a resemblance of the medieval religious trial, and inciting an atmosphere of anti-DPRK confrontation. The purpose behind these moves is crystal clear.

The Abe quarters are now relying on all kinds of deceptions and tricks to revise the constitution by any means and make Japan a country that can conduct a war.

If the Japanese reactionaries still think that they can put the sovereignty of Korea on a chopping board and chop it together with neighboring countries as in the past, there is no greater mistake.

If the Japanese reactionaries like Kono keep on clinging to anti-DPRK confrontational mania without any sense of their current status, it will result in digging out their graves by their own hands.

The Japanese authorities would be well advised to show discretion and prudence with clear understanding on the might of the DPRK that has now become a full-fledged strategic state.
