## **Kim Jong Un Visits Songdowon General Foodstuff Factory**

The respected Supreme Leader **Kim Jong Un**, together with Ri Sol Ju, gave field guidance to the Songdowon General Foodstuff Factory.

Going round various production processes of the factory after hearing the explanation at the room dedicated to its history, he learned in detail about the technical facilities and production.

Watching various foodstuffs being churned out at the worksites with food processing facilities in rows, he noted with high appreciation that the factory works hard to modernize production processes and improve the quality of products and thus has over-fulfilled its plan every year while mass-producing the products that the people highly demand and like.

Watching each kind of foodstuff produced by the factory, he said that recently the level of product packaging and trademark design has been improved remarkably in the field of the foodstuff industry, adding that the varieties of foodstuffs being produced by the factory are numerous and diverse and the packaging is diverse and its level is very high.

Saying it is very good that the products of the factory are supplied to the whole country as well as to the province and they were appreciated as being not inferior to the products of central foodstuff factories, he called for conducting active competition among foodstuff factories across the country and thus bringing about a surge in production and expanding successes through a drive in which one learns from others and overtakes others.

Stressing the need to ensure the strict and correct inspection of quality and control over foodstuffs of different storage conditions in keeping with the increasing varieties of products, he said that in particular, it is necessary to strengthen the product inspection system for thoroughly guaranteeing the quality and hygiene security of the foodstuffs and medicine which have direct impact on

the health and life of people and to improve and modernize the inspection method and means.

Saying that the factory should push ahead with the modernization drive for putting more perfectly all production processes on an automated, unmanned and germ-free basis, holding aloft the banner of self-reliance and relying on our own technical force, materials and equipment and thus turn itself into a production base with Juche character which is operated with locally available raw materials, he stressed the need to set a correct long-term goal and make tenacious efforts to attain it.

He said that the sci-tech learning space should be effectively operated to prepare the employees to be knowledge-based working people so that they do their shares in technical updating of production processes and modernization of equipment and to make sure that new ideas of technical innovations and original concepts are produced from among the producer masses.

He had a photo session with the officials and employees of the factory, after voicing his expectation and conviction that they would conduct the management activities well and produce more quality foodstuffs and thus more fully demonstrate the honor of being a factory loved by the people and a factory serving them.

He was accompanied by Hang Kwang Sang and Jo Yong Won, leading officials of the Central Committee of the Workers' Party of Korea.

## Kim Jong Un Visits Wonsan Disabled Soldiers' Bag Factory

The respected Supreme Leader **Kim Jong Un**, together with Ri Sol Ju, gave field guidance to the Wonsan Disabled Soldiers' Bag Factory.

Going round several places of the factory, he learned in detail about the production of schoolbags.

Now it is necessary to direct efforts to raising the quality of schoolbags as material and technical foundations have been satisfactorily laid for producing hundreds of thousands of schoolbags in each province, he said, stressing the need for the bag factories in provinces to conduct proper quality control over products, raise demand and thus put the schoolbags supplied to children and students of the whole country on the same qualitative level.

He underlined the need for central organs to work out a plan for the responsible supply of raw and other materials for the production of bags including canvas, zipper, tape, synthetic leather, metal fixtures and plastic processed goods to make sure that the production is put on a regular basis at bag factories built in provinces.

It is the intention of our Party to provide our children and students with quality notebooks, schoolbags, school things and school uniforms made in the country so as to make them cherish patriotism of taking their own things dear to them and loving them since their childhood, he said, repeatedly asking the official and employees of bag factories across the country to work heart and soul with devotion to ensure the quality of bags just as they would make bags for their own children.

He stressed the need for the employees to put precedence to the work of enhancing the technical skill, strictly abide by the requirements of technical regulations in every production process, conduct technical exchanges among bag factories, learn with each other and brainstorm ideas in effecting a surge and innovation to improve the quality of bags.

He had a photo session with the officials and employees of the Wonsan Disabled Soldiers' Bag Factory, highly appreciating their strenuous efforts to put the production going on at a high rate after building the factory to be proud of with their own efforts, technology and materials in a short time.

Stressing the importance to value, respect and take good care of disabled soldiers, he asked the provincial party committee to help the factory with deep care so that they can devote their sweats of sincere labor in their worthwhile and honorable work for the future generations and thus continue to keep the revolution flourishing.

Accompanying him were Han Kwang Sang and Jo Yong Won, senior officials of the Central Committee of the Workers' Party of Korea.

## **Kim Jong Un Inspects KPA Factory No. 525**

The respected Supreme Leader **Kim Jong Un** inspected Factory No. 525 of the Korean People's Army.

He looked round the room for education in the revolutionary history at the factory first.

He said that the officials and employees of the factory should always overfulfill the production plan on all indices, bearing in mind the noble intention of leader Kim Jong Il who spared nothing for the soldiers of the People's Army, and thus make sure that they still feel his loving care.

He learnt in detail about the implementation of the teachings given by Kim Jong Il during his on-the-spot guidance and the production at the factory and the supply of raw materials in recent years.

Highly appreciating the fact that the factory has over-fulfilled its plan every year, he said that it should direct its efforts to producing in a larger quantity various condiments of good taste to meet the demand of the science of nutrition and thus substantially contribute to improving the diet of the servicepersons.

He went round the fermented soybean liquid spore production process newly built at the factory.

Saying that it is necessary to provide the servicepersons with various soybean-based foods in line with the soybean production that has increased after the whole army gave foremost importance to soybean farming and, in particular, with fermented soybean good for eating and health on a regular basis, he stressed it is a great success that the factory is equipped with modern process capable of mass-producing the quality liquid spore for fermented soybean on an industrial basis.

Going round various parts of the factory including the condiment workshop and the rice-cleaning workshop, he said that he heard it was upgraded three years ago and it is an impeccable and praiseworthy factory with all production processes put on an automated and unmanned basis at a high level and he was very pleased to see the equipment in full-capacity operation and production put on a normal track when he suddenly visited the factory.

He highly estimated the master-like work attitude of the factory officials and employees, saying that the greening and pavement of the factory are satisfactory and they have put the interior and exterior of the factory on a hygienic and cultured level in an assiduous way as befitting foodstuff factory.

He set forth the tasks for scrupulously managing equipment and improving technical control and for working hard with higher goal of putting the production processes on an automated, unmanned and germ-free basis.

He had a photo session with the officials and employees of the factory, expressing the expectation and conviction that they would continue to make proud achievements in production to supply servicepersons with variety of tasty and highly nutritious foodstuffs in a larger quantity and thus perform a pioneer role in developing the foodstuff industry of the country in the future, too.

He was accompanied by Hwang Pyong So, Han Kwang Sang and Jo Yong Won, senior officials of the Central Committee of the Workers' Party of Korea.

## **Kim Jong Un Inspects Kangwon Provincial Tree Nursery**

The respected Supreme Leader **Kim Jong Un** inspected the Kangwon Provincial Tree Nursery.

He went round various places of the nursery.

When he inspected the Tree Nursery No.122 run by the Korean People's Army, in which the production of tree saplings is put on a perfect scientific, industrial and intensive basis, two years ago, the Supreme Leader advanced the tasks for each province to build a modern land-saving and manpower-saving tree nursery capable of turning out twenty millions of saplings a year like the Tree Nursery No.122 and make the Kangwon provincial tree nursery a model and standard of nurseries to be built in provinces. And he took such detailed measures as provision of designing, construction, funds, materials and equipment and has wisely guided the work for building tree nurseries.

Expressing great pleasure over the fact that another large-scale base capable of producing more than twenty millions of saplings a year was successfully built, he noted with high appreciation that Kangwon Province completed a huge project in a short span of time and properly took measures for matters arising in managing and operating the tree nursery in the last one year and thus built up a material and technical foundation for safe production of saplings.

Saying that the rich forest resources are a precious asset for economic construction, he stressed it is necessary to build the tree nursery, which is like an arsenal for the forest restoration campaign for turning all the mountains in the province into gold mountains and natural raw material base, as a grand edifice of eternal value impeccable in the distant future, too, and to produce saplings on a large scale.

Noting that if the newly-built imposing tree nursery fails to produce tree saplings to its full capacity, it will be of no use, he called for putting the production of saplings on a higher scientific basis, ensuring two rounds of production in a year and thus producing and supplying more saplings of good species which are of high economic and ornamental value and suited to the climatic and soil conditions of the province to substantially benefit from tree planting and make them prove effective.

He called for finishing at an early date the construction of tree nurseries now underway in provinces on the basis of the achievements and experience gained in building a model nursery which has put the production of saplings on a higher scientific, industrial and intensive basis.

He stressed the need to conduct on a regular basis the technical study through sci-tech learning space and set up experience-exchange and tele-consultation system among tree nurseries so as to further raise the level of technology and skills of the employees and actively develop and perfect the advanced sapling cultivation technology.

Noting that administrative building, conference hall, general amenities and dwelling houses of employees were built at the same high level as those built by a central professional construction unit, he stressed the need to meet the requirements of the developing times and suit the level of high civilization as desired by the people even in building a dwelling house.

He visited a house of discharged couple who are employees of the nursery on that day where he talked to them to take good care of their life.

Saying that he was very satisfied to go round the nursery, he pointed out that the people in Kangwon Province have distinguished fighting spirit and mental world as they take the lead in upholding the Party's calls with devotion and are ready to turn out as one in the drive for implementing the Party policies.

He added that he could not but admire them for building such a huge nursery under difficult conditions where everything is in need, and that he is pleasing to give assignments to the Kangwon Provincial Party Committee as it always takes the lead in implementing the Party policies and he wants to help even a bit its officials exerting themselves to do even one more thing. He took such warm solicitude of making sure that problems urgent for the economic work of the province are solved on the spot.

He had a photo session with the officials and employees of the nursery, expressing belief that they would put the production of tree saplings on a high-level and regular basis with high sense of responsibility of being outpost and scout men in charge of the forest restoration campaign and thus make active contribution to turning the whole country into thick woodland.

He was accompanied by Hwang Pyong So, Han Kwang Sang and Jo Yong Won, senior officials of the Central Committee of the Workers' Party of Korea.
