Supreme Leader Kim Jong Un Inspects

Hot Spring Tourist Area under construction in Yangdok County

Pyongyang, November 1 (KCNA) -- **Kim Jong Un**, chairman of the Workers' Party of Korea, chairman of the State Affairs Commission of the DPRK and supreme commander of the Korean People's Army, provided field guidance to the construction site of the Hot Spring Tourist Area in Yangdok County, South Phyongan Province.

Learning about several layout proposals in front of the master plan of the construction of the Hot Spring Tourist Area, Supreme Leader of the Party, state and army **Kim Jong Un** gave detailed instructions for the modification of the master plan.

He said that the area is the best place for hot spring recuperation and tourism as it has advantageous transport conditions, beautiful landscape and also huge annual yield of hot spring of high temperature whose key components are simple silica, sulfur, fluorine-weak alkaline which are efficacious for treating various diseases. He added that peculiar Korean style designing and excellent services would provide another world-level cultural and emotional life base which would contribute to the promotion of the people's health and where they can enjoy a highly civilized life.

Urging the need to complete the designing at an early date, a process that should be given precedence to for the development of the Hot Spring Tourist Area, he called for ensuring the highest level in terms of architectural beauty and conveniences by taking into account all things best in the world.

As the Hot Spring Tourist Area is divided into recuperation section and tourist and relaxation section, it is necessary to work out technical assignments first based on deep study of data on hot spring service facilities in various countries of the world, he said.

The recommendations for the construction of the Hot Spring Tourist Area, recently submitted by the Designing Bureau of the State Affairs Commission, envisaged allocating the technical assignments of projects of the area to ministries under the Cabinet and national institutions including the Ministry of Public Health, the Ministry of Labor, the National Tourism Administration and the General Bureau of Public Catering Service, he recalled, saying that doing so would not help build the area as the world-level one as intended by the Party.

This construction is a project directly initiated and proposed by the Party for the people's enjoyment of a highly civilized life and for the promotion of their health and therefore, the technical assignments should be worked out through close collaboration with the government hospital with full charge held by relevant departments of the Party Central Committee and the SAC, he said. He gave valuable instructions for hours for the designing, saying that the Designing Bureau of the SAC should take the lead in responsible designing with the involvement of the capable designers' group.

Pointing out that the construction of the Hot Spring Tourist Area has to be wonderfully completed at the highest level by October 10 next year as was promised to the people, he set forth specific tasks for finishing the foundation work of buildings by the end of this year and pushing forward the processes that require

precedence through measures for regular power and communications, service water supply, sewage disposal, railway lines, road network reconstruction and expansion and afforestation and greening.

The Party regards the construction of the Hot Spring Tourist Area in Yangdok County and Onpho Hot Spring Rest Center reconstruction project in Kyongsong County as key tasks, he said, emphasizing the need for army and people in all provinces to spruce up resort centers around hot springs in their areas by their concerted efforts with these projects as a model.

We are undertaking not a few projects now for the cultural and emotional life of the people and it is not because we have particularly advantageous conditions and things extra, he said, adding that they represent creatures being built by the firm determination and strong will of the Party to put our people best in the world on the highest ground of the socialist civilization at an early date by braving manifold hardships. He said that the People's Army should wonderfully build another possession of the people to be praiseworthy in the world as befitting admirable sons and daughters and creators of the happiness of the people, bearing deep in mind the trust of the Party which has entrusted to them the construction of the Hot Spring Tourist Area, the first of its kind in history of our country.

He was accompanied by Choe Ryong Hae, member of the Presidium of the Political Bureau of the C.C., WPK, vice-chairman of the State Affairs Commission of the DPRK and vice-chairman of the C.C., WPK, Jo Yong Won, Pak Chang Ho and Kim Yong Su, vice department directors of the C.C., WPK, Kang Il Gyong, chairman of the Yangdok County, South Phyongan Province, Committee of the WPK, and Kim Chang Son and Ma Won Chun, officials of the State Affairs Commission. -0-

Supreme Leader Kim Jong Un Inspects

Wonsan-Kalma Coastal Tourist Area under Construction Again

Pyongyang, November 1 (KCNA) -- **Kim Jong Un**, chairman of the Workers' Party of Korea, chairman of the State Affairs Commission of the DPRK and supreme commander of the Korean People's Army, inspected the Wonsan-Kalma Coastal Tourist Area under construction again.

Supreme Leader of the Party, state and army **Kim Jong Un** enjoyed a bird's-eye view of the street of the area and looked around it with the aim of learning about how the project is making progress.

He said that he recently studied the layout of the street so much, and found that the whole street is not perfect in the artistic aspect; only the formative artistic quality of each building is stressed; the artistic reciprocity, compatibility and connectivity among the buildings are not flexible, and high and low buildings are not combined in a harmonious way.

Only when buildings of many different forms and scales are arranged in a harmonious way and their artistic reciprocity is ensured, can the city have its peculiar character and charm as a maritime park city, he said.

He instructed officials to envisage the construction of more hotels and inns with over 30 floors as he told in August and to arrange an office building which will house the party and working people's organization committees, the management committee, the security organs, the judicial and prosecution organs, etc. as a high-rise building near the coastal area so that they can become part of the street.

He also indicated a detailed orientation to build more game arcade, all-event stadium and movie houses within the area and plan large water park and funfair in a vacant lot between the coastal line and the airport.

He gave the officials the task to build a huge parking place in the area, rebuild the Kalma railway station and deeply study the issue of settling the public transportation in the area.

He said that a priority should be given to the afforestation and greening as he stressed in the past, adding that the design for the afforestation should be done well in keeping with the character of the coastal street and effort should be made for the afforestation.

He said that seeing the construction site of Myongsasipri (4-kilometer beautiful sand) rapidly making progress each day he could vision the 4-km beach turning into Inphasipri (4-kilometer tide of people) before long, adding that he is heartened and so pleased when he pictures the people leading a highly civilized and happy life on the beautiful East Sea coast of the country, a scenic spot rare to be seen in the world.

The country still suffers from difficulty, but lots of edifices to be envied by the world people, people's possessions and new happiness as well as the coastal tourist area will continue to come into being on this land without letup as our Party, which regards it as its main task to work for the wellbeing of the people, is pioneering the civilization of the new century and shaping the new world with its correct leadership and there are the immutable will and united efforts of all the servicepersons and civilians who follow the Party's orders and instructions through thick and thin, he said.

The hostile forces are foolishly keen on vicious sanctions to stand in our way toward promotion of people's wellbeing and development and to lead us to change and submission, but they will be made to clearly see over time how our country that has built up its strength hundreds of times defying hardship turns itself into a powerful nation by its own strength, technology and efforts, he said.

He continued to say that as he stresses once again, to register continued successes in such huge creation projects as the construction of the Wonsan-Kalma coastal tourist area under such difficult and tense situation as today would be a on-target impact on the hostile forces and is precisely a decisive battle for

safeguarding the authority of the Party and a worthwhile work for creating and bringing into a reality the happiness of the people. He added that everybody should bear this in mind and display popular heroism and indomitable fighting spirit to demonstrate once again before the whole world the work style in the era of the Workers' Party, the development potentials of our country and our own style development speed.

He believes that the people's cultural recreation center, people's maritime park to be envied by the world will be built to astonish the world again on the occasion of October 10 next year by dint of the tremendous efforts of the builder-masses intensely loyal to the call of the Party, he said, calling for making a brave charge to bring earlier the day when the people's laughter and song of happiness would resound throughout Myongsasipri.

He was accompanied by Choe Ryong Hae, member of the Presidium of the Political Bureau of the WPK Central Committee, vice-chairman of the State Affairs Commission of the DPRK and vice-chairman of the WPK Central Committee, Jo Yong Won and Kim Yong Su, vice department directors of the WPK Central Committee, Kim Chang Son, department director of the State Affairs Commission, and Ma Won Chun, bureau director of the SAC. -0-
