Supreme Leader **Kim Jong Un** Guides Strike Drill of Defence Units in Frontline Area and on Eastern Front

Pyongyang, May 5 (KCNA) -- **Kim Jong Un**, chairman of the Workers' Party of Korea, chairman of the State Affairs Commission of the Democratic People's Republic of Korea and supreme commander of the armed forces of the DPRK, guided the strike drill of defence units in the forefront area and on the eastern front which took place in the East Sea of Korea on Saturday.

The purpose of the drill was to estimate and inspect the operating ability and the accuracy of striking duty performance of large-caliber long-range multiple rocket launchers and tactical guided weapons by defence units in the frontline area and on the eastern front and the combat performance of arms and equipment and to more powerfully arouse the entire army to the movement for becoming crackshots with the drill as an occasion and thus put it at combat readiness posture all the time.

At the observation post Supreme Leader **Kim Jong Un** learned about the strike plan of the striking means of different calibers and inspected the fire readiness including the advance to and deployment of large-caliber long-range multiple rocket launchers and tactical guided weapons in fire positions.

After setting the sequences and methods of strike, the Supreme Leader gave an order of firing.

Praising the People's Army for its excellent operation of modern large-caliber long-range multiple rocket launchers and tactical guided weapons, he said that all the service members are master gunners and they are capable of carrying out duty to promptly tackle any situation as a result of full knowledge of modern weapon system and intensive training. He spoke highly of the successful striking drill though it was organized without an advance notice.

Expressing great satisfaction with the rapid response ability of those defence units in the frontline area and on the eastern front to keep them fully ready to go into combat action immediately upon the issuance of order any moment, he gave important instructions for improving and strengthening the operation and combat drill of the People's Army.

He stressed the need for all the service members to keep high alert posture and more dynamically wage the drive to increase the combat ability so as to defend the political sovereignty and economic self-sustenance of the country and the gains of revolution and the security of the people from the threats and invasion by any forces, bearing in mind the iron truth that genuine peace and security are ensured and guaranteed only by powerful strength.

Watching the drill together with him were cadres of the Central Committee of the Workers' Party of Korea including Kim Phyong Hae, O Su Yong, Ri Pyong Chol and Jo Yong Won. -0-

Supreme Leader **Kim Jong Un** Gives Field Guidance to Kумыangang Power Station No. 2

Pyongyang, May 5 (KCNA) -- **Kim Jong Un**, chairman of the Workers' Party of Korea, chairman of the State Affairs Commission of the Democratic People's Republic of Korea and supreme commander of the armed forces of the DPRK, gave field guidance to Kумыangang Power Station No. 2 on Saturday.

After being briefed on the circumstances of the construction of the power station and its situation, Supreme Leader **Kim Jong Un** looked round several parts of the power station including the dam and a generating room, learning in detail about the construction, technical equipment and power generation.

It is admirable that Kумыa County is set to build power stations by its own efforts and put the power production on a normal footing in hearty response to the Party's policy on building minor hydraulic power stations suited to the specific local conditions and settling the power problem, he said, speaking highly of the praiseworthy feats performed by the people in the county who created the treasure of national value in the revolutionary spirit of self-reliance and fortitude.

He said that there are not a few examples in which cities and counties fall short of getting benefits from minor power stations due to water shortage that led to failure to ensure capacity generation of electricity even though they were built at the cost of massive building materials because the construction was not based on accurate survey of hydraulic resources in the specific areas and on scientific calculation of the amount of electricity generation.

If Kumyagang Power Station No. 2 installs thousands of kW power generator as planned and produces electricity at full capacity, it will please the people as it can fully supply power to residential areas, to say nothing of the industrial factories and co-op farms in the county, he said, repeatedly praising the indomitable fighting spirit displayed by the officials and working people of Kumya County in which they provided an important boon for the wealthy economic life of the county with strenuous efforts.

Noting that he would feel relieved only when he does something to help the people in Kumya County who did a big thing without being known to others, he promised to send generator and transformers without fail, which have not yet been installed at Kumyagang Power Station No. 2, on his own responsibility.

He gave warm encouragement, hoping that Kumya County would ensure the good operation of the power station, a great treasure, to make the people substantially benefit from it and to contribute to the development of county industry and improvement of the people's living and thus prosper as a beautiful county good to live in and develop with vitality.

He was accompanied by officials of the Party Central Committee including Kim Phyong Hae, O Su Yong, Jo Yong Won, Kim Yong Su and Ri Yong Sik. -0-
