Where is the True Paradise for Women?

One hundred and twelve years have passed since March 8 was designated as the International Women's Day at the second international socialist women's conference held in Denmark in 1910.

Women in the DPRK, holding the benevolent father of people in high esteem, are leading genuine worthwhile life and happiness being endowed with the rights and dignity as full-fledged masters of the country.

Respected Comrade **Kim Jong Un**, regarding women highly as flowers of the country, of happiness and of family, is granting them all kinds of affection and care.

Respected Comrade **Kim Jong Un** arranged a grand concert on March 8 International Women's Day several years ago so as to extend his warm congratulations to women all over the country, and saw to it that up-to-date buildings—Breast Tumor Research Institute, Pyongyang Cosmetics Factory, etc., are erected wonderfully for women.

In October 2013, respected Comrade **Kim Jong Un** visited the Pyongyang Kim Jong Suk Textile Mill. He personally selected the site for the lodging house to be newly built and took benevolent measures to finish the construction before May Day the next year even this means delaying major construction projects.

When the lodging house was completed as the workers' palace and the workers' lodging house which has no parallel in the world, he was the first to come here. At that time, he took solicitous care for the female workers to the minutest detail of their lives with parental affection, i.e. the wardrobe should be made long enough for the girls to put their traditional

Korean dresses, low-beds should be placed, and the drawers be attached under the beds for the girls to put in their personal effects and so on.

Like this, under such fatherly love unprecedented in the world, the female workers were brought up as the full-fledged female revolutionaries who are turning firmly one of the wheels of revolution on the road of victory for dynamic advance and development of socialism.

In the capitalist countries, however, the desire of women to extricate themselves from social inequality and restriction is mercilessly trampled upon and they are subjected to constant misery and suffering, fading away in futility even till today.

At the very beginning of the new year, acts of violations of women's rights are committed one after another in the Western countries. Three women in France were killed by their husbands and partners and a 24-year-old woman in Japan took her own life under the heavy pressure of all kinds of difficult living conditions and harsh labor.

On February 23, New York Times reported that the mortality rate of pregnant and nursing women in the U.S. are on the increase from 1987 onward, saying that the year 2020 recorded a 14% rise compared to the previous year.

On the other hand, the Ministry of the Interior of France announced that the number of domestic violence against women in 2020 reached up to more than 139,200 cases.

All the above is the inevitable outcome of the deep-rooted disdain for women inherent in the capitalist society where women are treated no more than "talking tools" and "child-breeding machines".

The paradise dreamed by hundreds of millions of women across the 5 continents of the world beyond the century - this is being translated into reality in Korea where women of the whole country lead a happy life as flowers of the country, of life, and of family thanks to the politics of love of respected Comrade **Kim Jong Un** of highly regarding and respecting women.

Contrast Road Where the Aged Walk Along

On March 5, 2015, 7 years ago, the respected Comrade **Kim Jong Un** personally visited the Pyongyang Old People's Home which was being wonderfully built as required by the new era.

On this day, he looked around the construction site for a long time and gave a detailed guidance to furnish it fully with facilities so that old people can arrange their life time and emotional life in a diversified way and conduct physical training suited to their physical and psychological characteristics.

He also told in earnest that not only Pyongyang Old People's Home but also every nursing home for the aged across the country should be built as true homes to make sure that the health-seekers continue to lead their dignified lives even at the old age enjoying respect and love as revolutionary forerunners and seniors, under the concern and care of the Party, state and the whole society.

In this world, the one and only leader of people who is so much considerate about the elderly people even spending valuable time is none other the respected comrade **Kim Jong Un**.

It was under such meticulous guidance of the respected comrade **Kim Jong Un** that the Pyongyang Old People's Home was furnished grandly. Each visitor here can hardly refrain from expressing his or her admiration at high-class living rooms scenting thick air of national fragrance, and comprehensive treatment room, sanitary facilities, library, physical exercise room, amusement hall and inner garden, etc., all of which are a congregation of giving a top priority to convenience.

However, when we look around the world, we can find the miserable looks of the elderly people forsaken by the state and society ransacking the trash cans to eke out a daily living in the countries which often create a sensation about an "all-people-equality" and "social welfare".

In Japan which is mouthing phrases about the high economic growth, terrible incidents take place one after another where children mistreat their parents and, worse still, murder them on a plea of abject living conditions. Elderly people, finding it difficult to live any longer, become the principal

offenders of murder, robbery and plunder, and choose for prisons of their own accord.

A post-retirement life is just like a reprieve; unless we steal things, we have no other way but to starve to death, let us eat properly even in prison. - This is a lamentation of elderly people in capitalist countries including the United States.

The sharp contrast between the images of our elderly people who are living in happiness with all smiles under the socialist system where it has become a tone of society to give a preferential treatment and take a good care of the elderly people throughout the country and society vs. the images of those in capitalist countries who shed tears of depravity and despair in the streets and prison cells – this clearly shows the comparative merits and demerits between man-centered socialism and money-is-everything capitalism.

The looks of our elderly people who have become more vigorous in happiness and comfort thanks to the love and care of the respected comrade **Kim Jong Un** show as it is the true picture of our country which is warm with the love and affection of the great father.
