

**The Respected Marshal KIM JONG UN is the great sun of 21<sup>st</sup> century who is leading the Korean revolution and the cause of the world independence to the victory by the outstanding leadership:**

**A paper discussion by Comrade Martin Mukasa, Chairman of the Uganda - D.P.R. Korea Friendship Society**

The Democratic People's Republic of Korea for producing outstanding leaders who have worked selflessly to safeguard its sovereignty and uplift the status of the citizens economically, socially and politically. These values of leadership are undoubtedly rooted in the Juche philosophy, a guiding principal upon which this commendable success is hinged. Special compliments to the Eternal Leader Kim Il Sung for building a firm foundation.

Today, D.P.R.K is in a phase of rapid transformation under the 'New Great Leader' Respected Marshal Kim Jong Un with a zeal to build a strong nation with prowess in both security and economic might. At a time of his inauguration as the new Supreme leader of D.P.R.K, it was only the friendly forces who stood firm with trust in the new world Young-leader. However, with the evidence of progress in technology, scientific research, and infrastructural development at hand, this special leader has brought his country to the same level with other world powers, which is a sign of great leadership.

Among the major achievements of Respected Marshal Kim Jong Un is the unique only Korean love by his people especially the youth and vice versa. This has further built cohesion among the citizens and their leaders. As a result we are witnessing patriotism at the highest peak as citizens pledge to defend their fatherland at all costs in ensuring food security, quality education, democracy and international cooperation. This a great lesson for other leaders. For any success in running the state, the backing of the people is paramount.

After proceeding with the Songun policy, the Respected Martial has tremendously bolstered its defense mechanisms with nuclear capabilities putting a complete end to fears of invasion by its already nuclear enemies. At this level now, the world's nuclear weapons should be viewed and new policies devised for better control and safeguarding of international peace.

We expect more success in the future with the leadership of the Respected Martial Kim Jong Un.

Man is the master of his destiny.
