

AFRICAN REGIONAL SEMINAR ON KIM JONG UN, THE ETERNAL SUN

Introduction:

This is an opportunity for the African continent to host a regional seminar on Kim Jong Un, The Respected Leader referred to as the eternal sun who has led DPRK for four years.

Kim Jong Un is among great leaders who has made commendable contribution towards making DPRK advance along the road of Juche Philosophy under the leadership of the Workers Party of Korea (WPK). He laid a strong foundation of the Korean Revolution making the Korean people confident of having an invincible army able to defend the destiny of the country against reckless aggression and war provocations by the US and her allies.

Thanks to the wise leadership of the Supreme Leader, the gains of the revolution in political ideological, military and technical preparedness of the army, the threats of an attack by the US has been thwarted.

The first H-bomb and the Intercontinental ballistic missiles able to strike the US mainland is a safeguard to the Korean nation.

Sharing of successes against all fields of the revolution and construction is attributed to the single minded unity of the army and the civilians is commendable.

On economy, the Respected Supreme Leader underscored the “need to focus all efforts” in implementing the Five Year Strategy for national economic development. The strategy has made a great contribution to developing the country into an economic giant and improving the living standards of the people.

In the field of science and technology, main efforts have been directed in solving scientific and technological problems arising in modernizing industrial development, the main emphasis put on local production of raw materials. Thus those who predicted the ‘collapse’ of DPRK are now proved wrong.

In the field of agriculture, scientific farming methods have been proved to be a reality and in some areas double cropping has been proved to be expanding and highly efficient farming equipment are produced in order to attain the goal of grain production. The

production of fruits, mushroom and vegetables are increased to bring benefit to the people. He upheld the slogan of 'self reliance and self sufficiency' for making the country's economy sustainable. He once wrote in a document ,” Let us all serve the people.”

On peace and security of the Korean Peninsular, since the Korean War (1950 – 1953), DPRK has been consistently threatened by the US in gross violation of International Law by shipping nuclear weapons to South Korea. This has aggravated the situation in the Korean Peninsular and made DPRK on the defensive side.

So, DPRK has no option but to counter it with nuclear preparedness to defend its rights to peace.

Possession of nuclear weapons, DPRK has drastically changed the USA's outlook on DPRK. DPRK has now the capability to counterattack the enemy on all fronts be it on land, sea and in space especially by possessing H-bomb.

Comrade Kim Jong un once said, “If DPRK had no nuclear bombs the US led forces would unleashed war against the country.” He stressed to continue building a strong army under the banner of 'Songun' philosophy.

One western publication stated, “The era has gone when big powers decided on international situations. Now DPRK has emerged a power to be reckoned upon.”

We wish Respected Leader Kim Jong Un a Long and prosperous life.

We wish the socialist Songun policy a long life.

We wish peace and security in the Korean Peninsular
