Kim Jong Un Guides Strategic Ballistic Rocket Launching Drill of KPA Strategic Force

Kim Jong Un, chairman of the Workers' Party of Korea, chairman of the State Affairs Commission of the DPRK and supreme commander of the Korean People's Army, guided an intermediate-and-long range strategic ballistic rocket launching drill of the KPA Strategic Force on the spot.

The drill was observed by senior officials of the Central Committee of the WPK including Ri Pyong Chol, Kim Jong Sik, Jo Yong Won and Yu Jin, and officials in the field of defence scientific research including Jang Chang Ha and Jon Il Ho.

Respected Supreme Leader Kim Jong Un was greeted by commanding officers of the KPA Strategic Force including its General Kim Rak Gyom, commander of the KPA Strategic Force.

Involved in the drill were Hwasong artillery units of the KPA Strategic Force tasked with striking the bases of the U.S. imperialist aggressor forces located in the Pacific operational theater in contingency and intermediate-and-long range strategic ballistic rocket Hwasong-12.

As known to the world, the intermediate-and-long range strategic ballistic rocket launching drill of the KPA Strategic Force was conducted as a part of the muscle-flexing to counter the Ulji Freedom Guardian joint military drills the U.S. and the south Korean puppet forces finally kicked off in disregard of the DPRK's meaningful and crucial warning.

The drill was carried out through the combination of sudden maneuvers and strike in order to estimate and examine the posture of the KPA Strategic Force for prompt counteraction in contingency on the Korean peninsula and to confirm the actual war operation capacity of the intermediate-and-long range strategic ballistic rocket newly equipped by it.

The Hwasong artillery personnel, who were to conduct the launching drill for the first time in the capital city of the DPRK by order of Kim Jong Un, were all filled with strong militant enthusiasm.

Kim Jong Un arrived at the launching ground early at dawn and watched the artillerymen promptly moving and deploying the Hwasong-12 rocket launcher, praising them for their smart and accurate movement.

He learned in detail about the launch plan, preset flight track and target waters and issued an order to launch the rocket.

The fired ballistic rocket reflecting the dignity and might of the Juche-based nuclear power crossed the sky above Oshima peninsula of Hokkaido and Cape Erimo of Japan along the preset flight track and accurately hit the preset target waters in northern Pacific.

The drill had no impact on the security of the neighboring countries.

In the drill the rocket operational capacity of the Hwasong artillery units of the KPA Strategic Force for an actual war and the combat efficiency of the intermediate-and-long range strategic ballistic rocket it is newly equipped with were all proved perfect.

Kim Jong Un expressed great satisfaction over the successful launching.

Praising the Hwasong artillerymen of the Strategic Force for being well versed in the new ultra-modern rocket system and properly operating it, he said the drill would offer them an opportunity for gaining a good experience in their rocket operation for an actual war.

Noting that the current ballistic rocket launching drill like a real war is the first step of the military operation of the KPA in the Pacific and a meaningful prelude to containing Guam, advanced base of invasion, he said that it is necessary to positively push forward the work for putting the strategic force on a modern basis by conducting more ballistic rocket launching drills with the Pacific as a target in the future.

Sternly saying that the U.S. answered the DPRK's warning that it will closely watch the U.S. behavior with the bellicose war exercises for aggression, he added that the drill conducted by the Strategic Force is a curtain-raiser of its resolute countermeasures against the Ulji Freedom Guardian joint military exercises being conducted by the U.S. and its stooges.

Noting that it is a lesson the DPRK drew this time again that it should show action, not talk, to the U.S. imprudently denying the DPRK's initiative measure for easing the extreme tension, he stressed that the DPRK will continue to watch the U.S. demeanors as was already declared and decide its future action according to them.

He expressed great belief and conviction that the officers and men of the Strategic Force will further strengthen the combat preparations of Hwasong artillery pieces as required by the grim situation, be fully ready to go into action for decisive battle so as to launch powerful ballistic rockets anytime and thus check military racket of the U.S. imperialists and their followers and firmly guarantee the security of the country and the happiness of the people.

Officers and men of the KPA Strategic Force extended the warmest thanks to **Kim Jong Un**, peerless patriot and hero of the nation, who gave vent to the long-

pent grudge of the Korean people by mapping out a bold plan to make the cruel Japanese islanders insensible on Aug. 29 when the disgraceful "Korea-Japan Annexation Treaty" was proclaimed 107 years ago and approving ballistic rocket launching in the capital region, and pledged that once the Party Central Committee issues an order, they will fulfill their sacred mission and duty as the reliable nuclear force of the WPK in the van of the final sacred war which will win victory in the standoff with the imperialists and the U.S.
