

KPA General Staff Spokesman Hits out at S. Korean Forces' Reckless Military Provocation

The south Korean puppet forces made another armed provocation in the area along the Military Demarcation Line. A spokesman for the General Staff of the Korean People's Army gave the following answer to a question raised by KCNA on May 25 in this regard:

The MDL area is the most acute hotspot where huge troops of both sides constantly level their guns at each other.

At around 16:00 on May 23, watching a flock of birds flying in the sky above the forefront areas in Cholwon, Kangwon Province, the south Korean puppet forces opened warning broadcasting and fired more than 450 machine gun bullets into the DPRK side, claiming they spotted "unidentified flying objects crossing the MDL".

They, caught by mental derangement, blame a "north's mine" for a suspicious explosion in the MDL area, question a "north's torpedo" for the sinking of their own warship and claim a flock of birds flying into the south as a "drone from the north" and even a privy door as a "wreckage of the north's drone" and a thermos flask shell as a "shell of multiple rocket launch system of the north".

The recent military provocation is a stopgap measure to check the war-weariness sweeping the puppet army in the face of the rapidly developing nuclear and ballistic rocket technology of the DPRK.

No matter how loudly the south Korean puppet warmongers get vociferous about the sophisticated story about "southward flying of UFO", no one will believe it.

Instead, it will bring them bitter derision together with dirty disgrace as a criminal with habitual concoction of lies and misinformation.

The KPA is closely following the new confrontation hysteria of the provocateurs getting all the more reckless.
