DPRK Foreign Ministry Spokesperson Criticizes Some Forces for Making Issue of Its Routine and Self-Defensive Military Drill

Pyongyang, May 8 (KCNA) -- A spokesperson for the Ministry of Foreign Affairs of the Democratic People's Republic of Korea (DPRK) gave the following answer to a question put by KCNA on May 8 with regard to the fact that some forces are making an issue of the DPRK's recent military drill.

As has already been reported, a strike drill was conducted in the East Sea of Korea on May 4, the purpose of which was to check the operating ability of large-caliber long-range multiple rocket launchers and tactical guided weapons, the accuracy in mission fulfilment and the combat performance of military equipment of the defense units in the frontline area and on the eastern front and, on this occasion, to further galvanize the entire army into the movement for becoming crack shots and make thorough preparations for combat mobilization at all times.

The drill once again confirmed the rapid reaction capability of those defense units in the frontline area and on the eastern front that are fully prepared to go immediately into combat under any orders and at any moment.

Some forces, however, are making spiteful remarks on this routine and self-defensive military drill conducted by the DPRK.

There are some countries that have become totally mute so far on the proactive measures of crucial and strategically decisive nature taken by the DPRK for peace and stability of the Korean Peninsula and on the maximum patience demonstrated by the DPRK concerning the impasse created in the course of implementing the June 12 DPRK-U.S. Joint Statement because of the absence of due corresponding response to the said measures. These countries are now impertinently making spiteful remarks on our recent military drill of regular and self-defensive character.

The recent drill conducted by our army is nothing more than part of the regular military training, and it has neither targeted anyone nor led to an aggravation of situation in the region.

Any country carries on military drills for national defense and this kind of very normal drill is obviously different from the war exercises waged by some countries against other sovereign states.

In last March and April alone, the U.S.-south Korea joint military exercise "Dong Maeng (Alliance) 19-1" and joint aerial military drill were conducted in south Korea, and war drill plans aiming at us continue to be worked out even at this very moment.

For unknown reasons, however, there is only dead silence on these provocative military drills and war exercises.

Only our regular and self-defensive military drill is branded as provocative, and this is an undisguised manifestation of the attempt to press the gradual disarmament of our state and finally invade us.

We think this is very much unpleasant and regrettable, and we sound a note of warning.

Those forces would be well-advised that if they attempt to deny our sovereignty and self-defensive right by making baseless allegations against us at anyone's instigation, it might produce a result of driving us to the direction which neither we nor they want to see at all.

We will watch the future words and deeds of those forces. -0-

Enraged S. Korean Mindset Is Signal of Second Candlelight Resistance: KCNA Commentary

Pyongyang, May 8 (KCNA) -- South Koreans are becoming increasingly stronger in their demand for the dissolution of the "Liberal Korea Party"(LKP).

The petition movement for LKP dissolution that was occasioned by the display on the notice board of Chongwadae of a posting reading "I am beseeching that LKP is disbanded and the country is propped up" now appears to have an explosive dimension, according to local media.

The number of petitioners has exceeded 1.7 million in eleven days.

This eruption of rage and hatred of the furious south Koreans against the conservative group points to the public mindset as eager as that at a time of the past candlelight resistance when they ousted traitor Park Geun Hye and toppled her dictatorial regime.

The strong demand for the dissolution of the LKP by the broad spectrum of south Koreans shows that the traitorous political party has gone to the extremes in going roughshod against the trend of the times and the mindset of the people.

Now getting intent on disrupting the current of new history on the Korean peninsula, the conservative group is pleading with the outsiders to go ahead with the north-targeted war drills and is getting desperate in their bid to bring back the stand-off and danger of war in the past.

Openly citing the release of Park Geun Hye with acquittal and revocation of impeachment, the group tries to make its dream for power come true, in defiance of the mindset of candlelight demonstrators.

What the LKP has done are high-profile crimes that deserve severe punishment; slandering of the May 18 Kwangju Popular Uprising, insult to the bereaved families of ferry Sewol disaster victims and bullying acts at the "National Assembly" sessions, to name just a few.

The conservative group is now going roughshod though it was pushed to a tight corner, severely punished by history. This situation proves that the group of traitors, trouble-maker of the nation, has to be thoroughly purged.

Daily increasing zeal for the disbandment of the LKP is a signal of the second candlelight resistance.

There was a candlelight rally demanding the immediate dissolution of the group of evils LKP in Kwanghwamun Plaza, Seoul on May 4 with over 2 000 people of different social standings in attendance.

The broad spectrum of south Koreans will lead the on-going movement to furious mass movement for the annihilation of the conservatives.

The group of conservatives which does people only disservice, looking down upon them, will surely face a miserable fate of being severely punished by the enraged people. -0-
