## **U.S. Is Responsible for Rupture of Hanoi Summit Talks: DPRK Foreign Ministry Spokesperson**

A spokesperson for the Ministry of Foreign Affairs of the Democratic People's Republic of Korea (DPRK) gave the following answer to a question put by KCNA on May 24, as regards the attempt revealing within the United States to impute to the DPRK the cause for the rupture of the Hanoi DPRK-U.S. summit talks:

As we have stated before, the underlying cause of setback of the DPRK-U.S. summit talks in Hanoi is the arbitrary and dishonest position taken by the United States, insisting on a method which is totally impossible to get through.

For the sake of building confidence, a main key to an alleviation of the DPRK-U.S. hostile relations, we took crucial and meaningful measures of a strategically decisive nature including the discontinuation of nuclear test and test-fire of intercontinental ballistic missile, and we also took a broadminded step towards the realization of the repatriation of the American POW/MIA remains.

However, the United States did not respond to our goodwill measures in the same manner, but deliberately pushed the talks to a rupture by merely claiming the unilateral disarmament of the DPRK.

Notwithstanding the above facts, the United States attempts to ascribe the setback of the DPRK-U.S. summit talks in Hanoi to a completely irrelevant issue and to impute the responsibility for the ruptured talks to the DPRK. Such American ulterior intention definitely needs to be brought to the attention.

We hereby make it clear once again that the United States would not be able to move us even an inch with the device it is now weighing in its mind, and the further its mistrust and hostile acts towards the DPRK grow, the fiercer our reaction will be.

Unless the United States puts aside the current method of calculation and comes forward with a new method of calculation, the DPRK-U.S. dialogue will never be resumed and by extension, the prospect for resolving the nuclear issue will be much gloomy.

The U.S. would be well advised to wake up to reality and learn anew how to have dialogue and negotiation.

## **Hostility and Prejudice Will Lead Japan to Self-Destruction and Isolation: KCNA Commentary**

Pyongyang, May 25 (KCNA) -- The rash acts of hostility of Japan towards the General Association of Korean Residents in Japan (Chongryon), an organization of overseas citizens of our dignified Republic, harden the Korean nation's will to settle accounts with the former.

At a recent meeting of the Cabinet ministers, the Japanese authorities, finding fault with Chongryon, defined it as an object subject to investigation under the Act for the Prevention of Sabotage, and adopted a decision to the effect that it is possible that the latter can commit a violent act of sabotage.

The Japanese authorities' branding Chongryon as an "anti-state organization" is a vivid manifestation of their deep-rooted hostile policy towards the DPRK and an expression of their vicious and black-hearted intention to crack down and stamp out Chongryon at any cost.

Chongryon has consistently worked for defending and ensuring the life and interests of Koreans in Japan and promoting friendship with the Japanese people as clarified in its action programme over 60-odd years since its formation.

It has conducted legitimate activities, abiding by international law and the Japanese laws without interference in the Japanese internal affairs and

promoted mutual understanding and friendly exchanges between the peoples of the DPRK and Japan.

This being a fact, the Japanese authorities claim that Chongryon has been involved in the "abduction issue", "illegal export case" and "sci-tech support for the DPRK". This is sheer sophism.

This is nothing but the malignant prejudice to make the public take Chongryon as a "violent body" while antagonizing it for no justifiable grounds and regarding it as the target of crackdown and obliteration.

To look back on history, the Japanese reactionaries have kept Chongryon as the first target of their hostile moves towards the DPRK and persistently resorted to a host of smear campaigns and crackdown against it.

In particular, the Abe regime which set the hostile policy towards the DPRK as the national policy is getting more vicious in its moves against the DPRK and Chongryon.

The shooting spree at the Central Hall of Chongryon in February was followed up by the Japanese customs authorities' fascist crackdown against the students of Kobe Korean High School on their return to Japan after visiting their motherland. This not only offended the juvenile minds of children but seriously threatened even the life and safety of Koreans in Japan.

In March, the right-wing gangsters of the Japanese No. 1 Party insulted and decried the students of the Korean schools. The right of Koreans' children to national education was also trampled upon as evidenced by the justification of a stop to the payment of subsidies for the Korean schools.

What is stunning is that the Abe regime is hell-bent on depriving Chongryon and the Koreans in Japan of all their democratic national rights including human rights, right to living and the right to business and also the legitimate rights universally recognized by international law, while enforcing its own sanctions independent of the UN sanctions, quite contrary to its lip-service for dialogue with the DPRK.

All the facts go to prove that the decedents of samurais remain unchanged in their hostile attitude towards the DPRK and Chongryon despite the changed situation and peaceful climate on the Korean peninsula which draws the attention of the world community.

The encroachment on the national rights of the Koreans in Japan amounts to the encroachment of the sovereignty of the DPRK.

The Abe group should remember that Chongryon just represents the dignity and sovereignty of the DPRK in Japan.

Reckless hostility and prejudice will lead Japan only to self-destruction and isolation.

The Japanese authorities would be well advised to roll back their anachronistic and hostile policy towards the DPRK and Chongryon, clearly understanding the trend of the times. -0

## **CPRC Reunification and Agitation Department Exposes Sordid Nature of LKP**

Pyongyang, May 25 (KCNA) -- The Reunification and Agitation Department of the Committee for the Peaceful Reunification of the Country (CPRC) of the DPRK released an indictment on May 24, revealing the sordid nature of the "Liberal Korea Party" (LKP) keen on covering up their high-profile crimes and taking power again under the pretext of the "people's livelihood" and "security".

The LKP is a group of gangsters that have inherited the "tradition" of fascist dictators.

Far back in the past at the time of its first predecessor "Liberal Party", it enforced fascist dictatorship by invoking the "Security Law". At the times of the "Democratic Republican Party", it instituted "anti-communist law", "yusin constitution" and "social security law". In the 1980s it enacted a "draft law on assembly and demonstration". Through the fabrication of more than 100 fascist laws as such, the party turned south Korea into a prison without bars characteristic of the conservative party.

The long line of the names ranging from the "Democratic Justice Party", "Democratic Liberal Party", "New Korea Party", "Grand National Party", "Saenuri Party" to the "Liberal Korea Party" that the party has taken up has accompanied corresponding rallying and dismissing.

In fear of the candlelight demonstrators that flared up, it changed the name "Saenuri Party" into the "Liberal Korea Party" and claimed "repentance", "shake-up", "parting with the past" and "modification". But a crow is never whiter for often washing.

Exposing the essence of the "people's livelihood" cited by the traitorous party, the indictment continued:

The crippled south Korean economy and the impoverished people's livelihood are entirely the product, consequence and miserable result of the unpopular rule pursued by traitors Lee Myung Bak and Park Geun Hye during their term from the conservative party.

Lee Myung Bak who presented himself as an "economy-minded president" brought unprecedented pain and sufferings to the south Koreans with the production of more than 5.2 million unemployed and over 10 million poverty-stricken masses.

Park Geun Hye visited other countries for the conclusion of the humiliating "Free Trade Agreement", spending three million USD at one time, allegedly to achieve "diplomatic performance" only to plunge the subservient bubble economy of south Korea into an abyss beyond control.

The indictment censured the shameful "security" rhetoric uttered by the harassers of peace. It continued:

The traitorous party has now gone desperate, justifying itself as "security guard" and "peace guard" everywhere in south Korea.

Insulting the historic north-south summits and declarations as "strategy risking security" and "meeting devoid of details of nuclear dismantlement deal" and "declaration that was dictated by the north" and "unilateral declaration reflective of the north's interests only", they viciously slandered them, stressing the need to "stop pleading for dialogue and to tighten sanctions and pressure on the north".

The sinister aim behind the rackets of the "leftist dictatorship" and confrontation with the fellow countrymen touted by the LKP under the signboard of "security" is to round up conservative elements through stereotyped coloring offensive, revive fascist dictatorship, hobble the north-south reconciliation efforts and create the phase of acute crisis of war far back in the past.

The LKP is a group of traitors that have to be thrown overboard together with the kingpins of evil doings.

Hwang Kyo An is the No. 1 target of the abolition of evils out of the LKP group keen on pushing back the wheel of history under the excuses of the "people's livelihood" and "security".

No matter how loudly the LKP group including Hwang may cry out for "people's livelihood" and "security", they can never cover up their sordid nature as the fascist party, the group of sycophantic traitors and confrontational maniacs and hotbed of evils.

It will be hard to realize new politics and new life wished by the south Koreans nor will it be possible to expect improvement in the north-south relations and peace and prosperity on the Korean peninsula with the cancer-like entity and group of traitors like LKP left intact.

However hard the traitorous party may try to find a way-out by citing "people's livelihood" and "security", they are destined to meet ruin, in the face of the fierce resistance and severe punishment by the people, the indictment concluded. -0-

## **S. Korean Authorities Should Break with Idea of Confrontation: KCNA Commentary**

Pyongyang, May 25 (KCNA) -- Recently, the U.S. Strategic Command made public that the south Korean military authorities took part for the first time in the nuclear attack drill Global Thunder that took place secretly at an air force base in North Dakota State, U.S. in November last year.

As known, Global Thunder drill is an annual global nuclear war drill that has been conducted in secrecy under the direction of the U.S. Strategic Command with the involvement of the 5th Bombing Group with B-52Hs and the 91st Missile Group with Minuteman-3s.

The U.S. had openly claimed in 2017 that one of the main purposes of the Global Thunder drill is to get familiar with the operation for striking the nuclear facilities in the DPRK.

Then, we cannot but ask the south Korean military authorities what happened in the Korean peninsula last year.

They signed the historic April 27 Panmunjom Declaration, the September Pyongyang Joint Declaration and the north-south agreement on military field last year. However, they went so shameless as to take part in the U.S. nuclear attack drill aimed at a preemptive attack on the DPRK behind the scene. This is another perfidious act against the compatriots in the north.

Such act is just one of many typical examples of disguised hostile acts persisted in by the south Korean military in collusion with the U.S. against the trend of the north-south reconciliation and peace.

The south Korean military, failing to drop the past evil habit of perpetrating military provocations, has ceaselessly conducted joint military drills in collusion with the U.S. against the DPRK though they had to be ceased.

The U.S.-south Korea joint military drill Alliance 19-1 and joint air drill were conducted in March and April this year. And plans of war drills against the DPRK are being mapped out even at this moment.

Nevertheless, the south Korean military is asserting that the military drills conducted by the army of the DPRK within its territorial land and waters under its regular drill plan are running counter to the idea of the north-south agreement on military field.

This is just the height of shamelessness.

The south Korean military is pursuing military confrontation, far from making efforts to develop the north-south relations and preserve peace and security on the Korean peninsula. This proves that the south Korean military doesn't actually want north-south reconciliation and cooperation and peace.

The above-said disguised act of the south Korean military, to say nothing of the open hostile acts they committed so far, constitutes an unpardonable provocation against the compatriots in the north. It draws bitterer disillusion and anger of all Koreans.

Dark cloud comes before a storm.

The south Korean authorities should cleanse themselves of the black-hearted confrontational idea and take a proper stand to honestly implement the north-south declarations and the agreement on military field.

All Koreans will never pardon the confrontational moves of the south Korean military going against the trend of north-south reconciliation and peace. -0-

## **KCNA Commentary Rebukes Japan's Smear Campaign against DPRK**

Pyongyang, May 26 (KCNA) -- The Japan police recently announced that a "specified missing person" was located in the country. They have so far claimed that "his possible abduction by north Korea can not be ruled out".

This has given the lie to the story about "abduction" touted by the Japanese reactionaries.

It is not the first time that the specified persons who were reported to have gone missing were discovered in Japan.

A person whom they claimed to have been abducted by north Korea emerged as a dead body inside the premise of a second-hand ship import and export company in Chiba Prefecture in August 2013. There are other ample examples of the discovery of "specified missing persons", when counting only those revealed by the Japanese media, notably those in September in 2013, November in 2014, June and October in 2015, and June and December in 2016.

This clearly proves the absurdity of the "abduction issue" touted by the Japanese authorities.

The increase on the number of missing persons, a serious social problem in Japan, is just anti-human rights profile of the island country.

The number of those who give up everything and turn into "outcast without identities" for such reasons as debts, unemployment, difficulty in schoolwork, and botched marriage life claims 100 000 in Japan every year.

There emerged a company called "overnight relocation" which earns money by helping people take to flight to shock the public.

No wonder, a movie-man of a country is shooting a documentary film called "Disappeared People" featuring the wretched life of the Japanese who live a desolate life without any social relations.

However, the Japanese politicians set up plot-breeding organizations related to the "abduction issue" in the government, Diet and society from long ago and have engaged in evil activities of all descriptions at the expense of huge amount of money to convince the Japanese and the world people of the "abduction" by north Korea.

Recently they kicked up huge anti-DPRK racket called the "rally of families of abduction victims" by deliberately linking with the DPRK tens of thousands of missing persons whose number far exceeds that of the "abduction victims" fabricated by them.

The Japanese reactionaries' racket for "solution to the abduction issue" is all about evading historical responsibility for their unprecedented bloody crimes committed by the Japanese imperialists in the past and justifying their hostile policy toward the DPRK.

The Abe group is made up of the most shameless and wicked men with good hands at swindling and plot-breeding.

It is a pipedream for Japan to think of attaining its dirty aim by spreading the threadbare "abduction issue".

The more loudly the Japanese politicians get vocal about the issue, the more offences it will commit before the Koreans and the world people.

Humankind will never pardon those reactionaries of history who deceive their own people and the world people to become a military giant and to realize the ambition of reinvasion.

The Japanese rulers are fated to meet miserable end of plunging into a trap set by themselves. -0-
