Dedication Immortal with History of DPRK-PRC Friendship

The great leader Comrade **Kim Jong Il** performed great feat for sustainable strengthening and development of DPRK – PRC friendship. Eleven years ago, he visited the northeastern region of the People's Republic of China from August 25 to 27, 2011.

Leading officials of the Chinese party and government and its people warmly welcomed the great General with great respect and admiration, who was visiting China for the ninth time since he left his first immortal traces on the vast expanse of Chinese territory in June, 1983.

Amidst the heartwarming hospitality offered by the Chinese party and government during his visit, the great General looked around several localities and enterprises, i.e. Hailaer district of Hulunbeier city in Inner Mongolia Autonomous Region, City Plan Exhibition Hall in Daqing City, Heilongjiang Province and Tonghua Wine Co., Ltd. in Tonghua city, Jilin Province, etc, and congratulated Chinese people for their successes achieved in the construction of socialism with Chinese characteristics.

The visit to the northeastern region of China by the great General was his last visit abroad during his revolutionary life. It served as an important occasion to fully demonstrate the traditional relations of friendship and cooperation between the two parties and the two countries of DPRK and PRC and also further strengthened the bond of friendship between the two peoples.

Thanks to the immortal dedication of the great General, the DPRK-PRC relations of friendship and cooperation could have continuously been carried

forward and developed with unflagging vitality, braving all sorts of hardships and trials of the history.

Today, the DPRK-PRC friendship is developing onto a new higher stage through the common struggle for the victorious advance of socialism thanks to close personal relations between respected Comrade **Kim Jong Un** and Comrade Xi Jinping.

The great exploits performed by the great leader Comrade **Kim Jong Il** for strengthening and developing the DPRK-PRC friendship will shine forever through centuries and generations together with his immortal traces left on the northeastern region of China.

No More Crimes By Blind Servility

Recently, a U.S.-led multinational military exercise has been conducted in Hawaii under the code name of "Fortune Guard 22".

On this occasion, New Zealand picked on us saying that our measures for bolstering self-defense capabilities constitute a threat to the security of Indo-Pacific region.

Spokesperson for the Ministry of Foreign Affairs of New Zealand presumptuously clamored on August 18 that reducing the "threat from the proliferation of weapons of mass destruction (WMD) by DPRK" is the purpose of the joint military exercise, talking about "comprehensive implementation of the UNSC 'resolutions' on DPRK", "exposing and checking its illegal practices at sea" and etc.

Our measures to bolster up national defense capabilities are an exercise of legitimate right to self-defense aimed at countering the security environment of the Korean peninsula born of America's hostile policy against the DPRK and defending the security of our country and people.

Last September, the U.S., which rigged up the "AUKUS", a trilateral security alliance, and agreed to transfer technologies for constructing nuclear-powered submarines to Australia, is indeed the main culprit of the proliferation of WMD.

The International society vividly remembers that New Zealand prohibited American nuclear assets from entering its harbor during the 1970s and 1980s and made its stands not to allow American nuclear-powered submarines to pass through its territorial waters after the establishment of "AUKUS" last September.

New Zealand sent its army to our country in response to the request of the U.S. and caused unforgettable sufferings to our people. Worse still, it is making, even today, a fuss about non-existing "threats of proliferation of WMD" by us. This cannot be regarded otherwise than an act of taking sides blindly with the U.S. hostile policy against the DPRK and committing more crimes against our people.

New Zealand should address the issue of the Korean peninsula at its own discretion and with a correct view if it truly wants peace and stability of the

Korean peninsula and the region, and furthermore, peace and stability of the entire world.

Attempt to Justify Moves for Military Power Can Get It Nowhere

There is a saying "add fuel to the fire".

This saying goes for the crooked words and deeds of Matsuno, Chief Cabinet Secretary of Japan.

With regard to the war exercise provoked by the U.S. and the puppets that undermine the peace and stability on the Korean peninsula, he asserted that Japan will work in unison with the U.S. and beyond to "make every possible effort to gather and analyse information about and keep a close eye on north Korea's military movement and will be fully prepared to secure peace and security of the country" and that it will "aspire to denuclearization of north Korea".

His remarks, in a word, are the manifestation of impure intention of Japan to justify its moves for military power, such as the revision of "peace constitution" and possession of capability of pre-emptive strike, by putting forth the "ensuring of peace and security" and "denuclearization".

It itself is an intolerable hostile act against the DPRK that Japan says it will exert all possible efforts into gathering and analysing information about us and keeping a close eye on us, in collusion with those who have lit the spark of the aggressive war exercise aimed at pre-emptive strike against our Republic.

While clamouring for the "world without nuclear weapons", Japan still opposes the abandonment of pre-emptive use of nuclear weapons clinging to the "nuclear umbrella" of the U.S., and destroys the ecosystem of the surrounding waters by discharging nuclear wastes into the sea. We expect

no proper words from such a country, but we can never tolerate the ridiculous act of the Japanese rulers, the double-faced liars, talking about “peace”.

Japan’s act of providing legal guarantee of a military power and putting spurs to enhancing its actual war capability has overstepped the boundaries to such a dangerous extent that it is trying to possess more than 1000 missiles with a range of 1000km targeting on the Korean East Sea and West Sea as well as most of the coasts of the Chinese East Sea and deploy them for action by 2024.

It is only a matter of time that rapidly-expanded Japan sets about the reinvasion to the detriment of global peace and regional stability.

Japan should discard its anachronistic illusion that it could gain another windfall as it did during participation in the Korean aggressive war waged by the U.S. in the 1950s, as it will put the life and security of its residents on the chopping board.
