For the past one month since the activation of the maximum emergency anti-epidemic system, the economic sector has further developed its capability for coping with crisis and undergone the days of nurturing its ability for meticulously guiding operation, thus gaining and drawing invaluable experience and lessons.

Among them are the issue of making the Party's new agricultural revolutionary policy prove effective from the first year of its enforcement by successfully concluding the farming of wheat and barley planted as earlier crops, the issue of directing all efforts to making full advance preparations for protecting crops from natural disasters to the maximum, the issue of putting manuring and cultivation of crops on a scientific basis, the issue of increasing the proportion of the farm work done by machines and the issue of intensifying guidance on scientific farming and rendering stronger state support to farming.

It specified the feasible measures to be taken in the light industrial sector to substantially promote the living standard of the people by waging a vigorous campaign for increased production on the principle of giving priority to fulfilling the demands of the people in their life.

It set forth the fighting tasks the construction sector should fulfill by completing without fail this year's important building projects one after another to demonstrate the mettle of Korean-style socialism to the world.
